## REPORT OF TRUSTEES OF STEVENS HIGH SCHOOL FUND.

The amount of this fund in the hands of the Trustees is the same as reported last year, \$10,000. The income for the year 1887, \$600, has been paid into the town treasury. The Legacy bequeathed by the late Paran Stevens, \$40,000, remains as heretofore, and it is uncertain when the amount will be paid over to the town, as the affairs of the estate are in litigation. We have no doubt regarding the ultimate payment, as the several legacies in the will have been declared by the court a lien upon the real estate, the value of which is much more than the amount of the legacies. Hon. Wm. M. Evarts has been employed by the committee appointed by the town, to urge in the courts such action as shall hasten the settlement of the Stevens' estate, and the payment of the legacy to the town of Claremont with interest.

*The Alden Literary Prize Fund*

consists of the real estate bequeathed by the late Mrs. Mary J. Alden, and \$806.82 deposited in the Sullivan Savings Institution. There has been received during the last year for rent \$144, interest \$33.15, and there has been paid out for prizes, \$120, and rent Tyler water \$10.

## Report of the Chief Engineer, for the Year ending March 3d, 1888.

The Chief Engineer would submit the following :

Our fire record for the year ending March, 1, 1888, consists of two fires. The first, Brown's Block, March 25, and the second, Lenvin's Carriage Shop, Oct. 5. The loss, in the latter case, was small, but in the former the loss of the building and to occupants thereof is estimated at about \$35,000, most of the property being well insured. In regard to this fire, of the faithful firemen and the department generally, successful in their efforts of confining the fire to the Block and working continually for thirteen hours, too much cannot be said in praise. The sad accident of hoseman Taylor, a man who always performed his duties with fidelity, is deeply to be regretted, and all should unite in giving him sympathy and assistance to bear his burden. We have added to the department the past year 1200 ft. of cotton, rubber lined hose, and two hose carriages at an expense of \$950 ; one-half of which was paid by disposing of two of our former hand machines, useless now to us since the purchase of the steamer. The introduction to the town of a fine water supply and to the location of twenty-three hydrants in different parts of the town, will be a valuable assistant in the protection of property. I would earnestly recommend that a sufficient sum be raised for the rent of aforesaid hydrants and for such an additional number as the town sees fit.

G. H. STOWELL, *Chief Engineer.*

## REPORT OF THE BOARD OF HEALTH FOR THE TOWN OF CLAREMONT, ENDING MARCH 1, 1888.

During the past year our people have been very fortunate in regard to the prevalence of contagious diseases. There have been a few cases of diphtheria and scarletina in a mild form. These cases have all been reported to the Board of Health and in each case the necessary precautions have been taken to prevent the spread of the disease. The physicians of our town without exception, have united with the Board in taking all necessary steps to confine these diseases to the particular locality where they appeared. In each case fumigation and disinfectants have been extensively resorted to. Notwithstanding the efforts that the Board and the physicians have put forth there are still many people who do not fully realize the importance of this matter, and seem to be indifferent in regard to consequences that may ensue. They should realize that this matter concerns the entire public, and should cheerfully comply with the rules and regulations published by the Board of Health. The law gives the Board of Health much greater power than it has ever exercised. It has been thought better by the Board to move slowly, and by so doing induce our people to act in harmony with the Board, rather than resort to extreme measures which can be done.

The citizens of Claremont ought to be able to judge by this time, as to the necessity of a Board of Health. If little or no good has been accomplished dur-

ing the last five years by this Board, it would seem to be useless to longer incur the expense of maintaining it. This question must be decided by the town. The Board is of the opinion that great good has been accomplished. First there is a more healthy and intelligent public sentiment on the part of the great mass of our people in regard to the necessity of observing the laws of health and preventing the spread of contagious and other diseases. Many nuisances have been abated, although much more remains to be done in this respect. During the past year our slaughter houses have been kept clean, and it has been demonstrated that a slaughter house can be maintained near private residences and not become a nuisance. All that is needed to prevent any unpleasant odors, is a watchful care and close attention to every part of the establishment, by those who have it in charge. The Board is of the opinion that it is better to have these places kept where they can be daily observed than in some retired place where no one will feel any responsibility.

There are some people in town who do not co-operate with the Board in suppressing nuisances, and are disposed to treat the matter lightly; but a very large majority are ready and willing to render all the assistance they can.

Those who have tenement houses are too often unwilling to look after drain-pipes, wells and cesspools, and the attention of the Board has frequently been called to these matters by the tenants. There should be an improvement in this respect. The great and crying evil in our village is the lack of suitable drainage. We now have an adequate supply of pure water and a system of drainage must follow. People are careless and indifferent in regard to garbage and refuse matter which is too often thrown into or along side of the public streets. This should be condemned, and vigorous measures should be taken to entirely stop this practice. There are a few people who persist in maintaining pig-styes in this beautiful village of Claremont, thereby annoying their neighbors and disgracing themselves. Another great nuisance is permitted and that is the using the sides of the streets as *cow-pastures*—covering the sidewalks with filth and annoying all the inhabitants. Cattle going at large this way should be taken up and driven to the public pound.

H. W. PARKER,	}	Board of
O. B. WAY,		Health.

REPORT OF THE SCHOOL BOARD  
OF THE  
**TOWN SCHOOL DISTRICT,**

For the year ending March 1, 1888.

---

There have been maintained in town during the year, twelve mixed, and nine graded schools under the supervision of substantially the same teachers as last year, there having been but two teachers employed during the year who have not taught in town before.

The general condition and progress of all the schools has been very satisfactory: there certainly have been no failures and though the results have not been equally satisfactory, in all cases there has been a very marked improvement in the general tone, spirit, and interest exhibited by the scholars in their work as well as much progress in method in teaching in many of the schools; there is less of simply memorizing answers, to questions from text books; in short, while we can see many chances for improvement, we think our schools compare favorably with other schools similarly situated, and are making a fair and steady advance in the direction of thorough, uniform, and systematic work.

Our grammar school by its attendance, correct deportment and scholarship, reflects great credit upon the scholars and District and especially upon the faithful and valuable services of the teachers who have so long had it in charge; of course the good work of the Primaries and Intermediates contribute in no small degree to the success of the grammar grade.

In the mixed schools with scholars of all ages and more classes than pupils, the opportunities for equally systematic work are wanting; and to judge them by the same standard would often do injustice. We can commend them all for faithful effort and a good degree of success. We desire to especially commend the West Claremont schools No. 4 and 5, (which we have heretofore considered as indifferent) for the very substantial improvement in almost every respect during the year; shall hope to see better houses make them really superior schools, as we are sure that pleasant, cheerful convenient rooms contribute largely to success.

The Teachers' Association has held monthly meetings, with a good degree of interest and we believe with benefit. Mr. Hastings and the other High School teachers have given the Association a cordial support.

We are often asked "if the Normal School training is necessary to make a

good teacher." We answer, No. The Normal School cannot supply the requisite faculty to teach or govern, and we know good teachers that have not had Normal training, but knowledge of Normal methods, and the science of teaching are quite essential, and are likely to make a good teacher a better one.

The Board have endeavored to run the schools with an intelligent economy and to know as nearly as possible the worth of each teacher, and the progress of every school, and so far as possible individual scholars; to be of service in matters of discipline and general oversight; but honest efforts on the part of the Board and faithful service on the part of teachers, are not all the requirements for the most successful results in the schools.

Personal interest of citizens and parents, an intelligent knowledge of the work done in the school room, are essential helps and encouragement to teachers and scholars; such a knowledge may remove prejudices and be an incentive to industry.

Parents should make it their business to drop into the regular working hours of the school; to be at a general exercise or examination is well, but not enough. An interested Overseer is around when the workmen are in their working clothes and the regular work going on, rather than at dress parade, if he wants to judge of their capacity and quality of work.

There has been very little friction in the management of the schools and as most people seem inclined to be reasonable, and to recognize the advantages of the present law, less is expected in the future.

The school house at "Slab City" has been thoroughly repaired, newly lathed and plastered. New windows put in with blinds, chimney built from the ground, hard wood floors and sheathing, new blackboards, modern seats and house painted.

The house in the Thomas District has been enlarged by an addition of ten by seventeen ft., room sheathed up, blinds to be put on, new blackboards, etc.

The Bluff Intermediate room has been enlarged by removing anterooms, building new entrance, laying floors, painting, etc. Making a very superior room well lighted. For the expenses of these repairs see the Treasurer's report herewith.

It is necessary to repair the house on Bible Hill. And the houses at West Claremont (Nos. 4 and 5) are entirely unfit for use in their present condition and should be repaired the coming year, or replaced by a new house.

No. 5 can be repaired if thought best to retain a house there.

No. 4 seems hardly worth repairing and it is not in the proper place for a school.

If practicable those two schools should be consolidated in the vicinity of West Claremont with two rooms for a graded school.

The other school buildings are in good condition needing only ordinary repairs.

Numerous maps, globes, blackboards, text-books etc., have been supplied during the year.

The usual statistical reports, Treasurers Report, Report of Tappen Fund, Register of scholars not tardy or absent are appended.

There are too many scholars in the District that do not attend school, but the average attendance of all that do attend is very creditable in all the schools.
